

- technically advanced product
- new design, the same price!

INNOVATION!

New design + new function:

- sealing brush is inserted in the profile groove, it absorbs the impacts upon the door closing with the self-closing hinge, and it eliminates minor unevenness of the window and net frame

- the profiles are connected by means of interior plastic corners

- the center partition (reinforcement profile) is inserted in the frame by means of the aluminium or plastic connection (as per the connection type):

- * rolled door's bar (type 1)
- * extruded handle partition
